XSkitchen

The (space) saving kitchen

XSkitchen

The name for modern space miracles

If the floor space is limited, it's worth going up: the space can be optimally utilised up to the ceiling with wall cabinets or open shelves. Special cabinet solutions create plenty of storage space. Planning "up" makes use of every centimetre. Pull-outs provide space for small appliances and can be fitted with organisation systems to keep everything tidy. Corner cabinets make sure that no storage space is lost in "dead corners".

Bright colours make the room look larger and brighter: white, cream, light grey or light wood tones bring in light. Walls and fronts should also be kept bright; natural stone worktops absorb light and make the kitchen look smaller. Light, glossy fronts or high-gloss surfaces create an optical illusion by reflection that makes the kitchen look even bigger, and add a sense of lightness to it.

Short & sweet

- Multifunctional surfaces and flexible elements
- Storage space up to the ceiling by using the space vertically
- Compact appliances at their best
- Customised (e.g. width reductions)
- Light colours and clear lines for visual expanse

Two is better

Clever combining is essential in order to make the best use of a small space. For instance, a pull-out waste bin cleverly placed inside the sink unit, and a fridge/freezer combination even put under a combination oven.

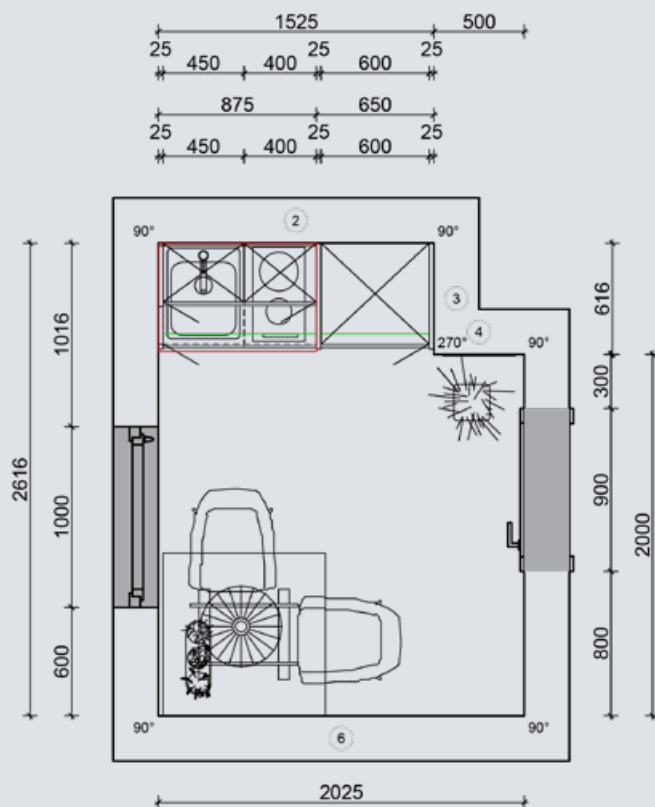

Anything goes

Small space, big possibilities

Less space doesn't mean less quality of life. Well - not with a clever kitchen solution. XSkitchen is the concept for living in a few square metres.

See how centimetre-accurate planning, clever combination solutions, and unique design ideas can result in kitchens that leave absolutely nothing to be desired. No matter how small or large they are.

Uncompromisingly good

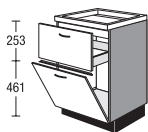

Design suggestions

What is important with an XSkitchen?
That the available space is perfectly utilised.

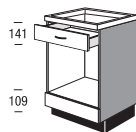

Thanks to specially developed cabinet solutions that have dual functions, it is possible to equip small kitchens with a maximum of 2.40 metres planning width, or small corner solutions, with all the functions of a large kitchen. Absolutely nothing is compromised in terms of quality and comfort.

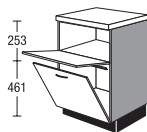

Perfect for small kitchens - special cabinet solutions for the maximum design freedom

True beauty – and greatness – lie in the eye of the beholder. Bright colours, clear lines, and reduced front designs help to make the space look bigger. And flexible solutions ensure that the best possible use is made of it.
